

**SAFETY
JOGGER
WORKS**

INDUSTRIAL PROFESSIONAL TACTICAL

A word from our General Manager,
Wim Vanderschuere.

First of all, I would like to thank you for your interest in the Safety Jogger footwear range.

I must say that, in my family, innovation in footwear has always been the key driver. With a clear focus on quality, comfort and pricing we aim to develop the right shoes for the right people.

To this day, our family-owned company Cortina sells over 32 million pairs of shoes worldwide on a yearly base, with the experience and knowhow of a highly motivated team and an unparalleled supply chain.

I am proud that for Safety Jogger, I can count on the same international organization to offer you a wide range of innovative safety products. As part of the Cortina, all investments come from the company's own capital, making us a very stable and future proof partner.

In today's competitive landscape, we strive to bring noticeable added value in terms of innovative product development, marketing and sales to all our valued customers.

Whether you have bought Safety Jogger, Oxypas or Maxguard before, you are part of our loyal distributor network or you would like to work with us in the near future, I will always be glad to be at your service.

I cannot predict the future, but I am certain it will be a safer one when we shape it together.

Wim Vanderschuere
wim.vanderschuere@safetyjogger.com

1950 - Start of our history in shoe knowledge with the establishment of a small shoe factory in Belgium with the name 'Cortina'.

1981 - Launch of the Cortina Safety footwear collection. As people mostly bought basic joggers to go to work, we felt the need to develop footwear with enhanced protection to help reduce the huge risk of workplace hazards.

1990 - Registration of the brand name Safety Jogger in Benelux. A collection of high protection (safety) athletic footwear (joggers) was born.

2000 - Launch of the brand Safety Jogger in Europe, with own distribution from our warehouse in Belgium.

2007 - Selling the first pair of Safety Jogger footwear in Asia and ready for expanding our worldwide distribution network.

2011 - Development and manufacturing of the Safety Jogger work gloves collection to protect more than only people's feet.

2014 - Launch of Safety Jogger in Russia.

2015 - Safety Jogger goes USA. To ensure our global 'always-in-stock' guarantee, we set up a brand new warehouse in Anaheim, California.

2016 - Investing in innovation and technology. Using a 3D printer with state-of-the-art software to develop faster and according to the highest industry standards.

2017 - Merged with Maxguard. Eight years after the founding of Maxguard, Maxguard opted for a company merge with Cortina NV.

2017 - Traction by Shoes for Crews. Shoes for Crews and Safety Jogger are introducing a new range of safety shoes into the European market in October 2017.

2018 - Launch of the Lightweight & Tactical collection.

2020 - Acquisition of Tiger Grip, specialist and expert in anti-slip shoes and overshoes.

Being Safety Jogger, it took a few years to become the brand that we are today. What started as a small shoe factory in Belgium called 'Cortina' grew into a international business that consists out of many brands, of which Safety Jogger is one of the first brands.

Today Safety Jogger is an international brand of PPE (personal protective equipment), part of Cortina. Being part of Cortina makes Safety Jogger a stable brand. This also gives us the opportunity to grow fast, without loss of quality in the process.

On yearly basis, Safety Jogger is distributed in more than 120 countries of the world. We are able to do so because Safety Jogger can rely on a tremendous team that is highly motivated to give more than 100% to satisfy their customers. Besides that, Safety Jogger can also rely on a flawless supply chain and a live stock management.

With a clear focus on quality, comfort and pricing safety jogger aims to develop the right footwear for its customers.

Vision

At Safety Jogger we believe in enabling our customers in their pursuit of their dreams. Through constant technical state-of-the-art innovation and knowledge, we deliver quality affordable professional footwear with unparalleled technology.

Mission

To make each workplace safer by delivering relevant innovation in professional footwear.

Ambition

Building the best professional footwear company in the world, with unparalleled speed to market, innovation and value creation.

| Become a retailer

Safety Jogger is worldwide and always looking for people who trust our brand as much as we do! We have a team of expert's ready for you to help with questions about our brand, technologies or reselling our products.

Trusted partner & exceptional service

- ✓ Unique **quality/price** ratios
- ✓ **Always-in-stock** guarantee
- ✓ Advance **technology** & innovation
- ✓ Only specialised **distributor channels**
- ✓ Technical **support** & live chat

comfortable footbed

The footbed ensures lightness, air breathability and comfort all day long. The footbed takes full-surface foot support to the next level while maintaining all other features such as shock impact zone, arch support, shock absorption, electro static discharge. With this footbed, your feet will feel comfortable and fresh all day long.

ultimate shock absorption

self-cleaning outsole profile

puncture resistance, steel & woven fabric midsoles

certified slip resistance

SRA slip resistant soles are tested on a ceramic tile wetted with dilute soap solution.

+ **SRB** slip resistant soles are tested on smooth steel with glycerol.

= **SRC** slip resistant soles pass both SRA and SRB slip resistance tests.

protective toe cap in STEEL, COMPOSITE or NANOCARBON

A protective toe cap made according to European or ASTM standard will protect the feet from impact, regardless the material.

Steel toe caps are conducting cold, heat and electricity.

Composite toe caps are lighter compared to a steel toe, reducing stress and fatigue on the legs and joints throughout long workdays. They are not conducting heat or cold in extreme temperatures, for extra comfort.

Nanocarbon toe caps are thinner than a composite toe and are therefore a solution for the thicker and bulkier composite toe.

Composite and **Nanocarbon** toe caps are metal free and practical when working in electrical hazardous environments, or workplaces with metal detectors such as courts, airports,...

NANO CARBON TOE CAP

Innovative Carbon Nanofiber material makes these safety toes the lightest and most advanced safety toe available on the market.

The weight of the SJ Nano Carbon toe cap is **50% less than a traditional steel** safety toe cap and **40% less than a standard composite** toe cap. The toe cap will not conduct heat nor cold, will not activate metal detectors, is non-magnetic, and static free, thus ensuring safety first!

The Safety Jogger Lightweight collection is the must-have for the hybrid workplace. With unique features such as a **removable footbed** with a built-in **air circulation** system and **shock absorption**, you will have one of the lightest safety shoes on the market.

LIGHTWEIGHT

TECHNOMESH LINING

The **breathable** technomesh keeps your feet dry and comfortable. As you walk, air is pushed and circulated through the fibers allowing the skin to breathe.

SRC - CERTIFIED SLIP RESISTANCE

The SRC standard meets the requirements of both SRA and SRB, meaning the slip resistance of the outsole was tested on a ceramic tile wetted with a dilute soap solution and on smooth steel plate with glycerol. Safety Jogger's slip resistant outsoles pass both tests with grace and do not only fulfill the minimum standards, but exceed them remarkably.

Safety Jogger has a variety of safety hiker boots, which are **perfect for many adventures**. As well as protective toe caps, our hiking boots also benefit from additional safety features, such as puncture resistant midsoles and a high level of cushioning & impact protection.

ESD IN INDUSTRIES

ESD and antistatic safety shoes are used in different type of industries **to protect sensitive equipment or components from electrostatic discharges**, such as aerospace, industrial equipment manufacturing, medical industry, hospitals and many more.

ESD can prevent a range of harmful effects on worksites. Uncontrolled release of static charges can cause gas, fuel vapour or coal dust explosions, as well as failure of solid state electronics components such as integrated circuits. Therefore it's crucial that people who work in these environments **wear ESD or antistatic safety shoes** to protect all electrical components.

R&D FACILITIES innovation in every step

From the well-considered design and construction to the final product distribution, Safety Jogger controls every step of the process. Advanced research & development facilities in Europe and Asia make sure all products are manufactured with the latest technological features and according to Safety Jogger's quality standards. Thanks to the knowledge of our experienced footwear professionals, the continuous investments in training and innovation and our motivated employees, we are able to exceed your expectations when it comes to functionality, product design and service.

LAB quality is key

Quality is key in our organization. By developing in our own facilities and by inspecting all materials in the company's specialized test laboratory, we can monitor every aspect of the products we produce. As a result, we got certified by the most known institutes in the industry and can guarantee our products meet the highest norms when it comes to protection.

A safety shoe for the food industry has to meet specific standards of safety and hygiene. The models with an upper made out of the **exclusive Lorica®** protect effectively against animal fats, oil, petrol, disinfectants and a variety of chemicals. Sustainable designing, we made as little stitches as possible – making it easier to clean the shoes.

SJ SOCK

Comfortable socks

Since safety footwear is mostly made of tough and harsh materials, it's essential to wear the best quality work boot socks to go with your boots. Our socks are designed to feel comfortable while working and because every foot is different, there is an elastic and fortified ankle so the Safety Jogger work boot socks seamlessly follow the anatomic shape of every individual foot. This way, you will not be bothered by annoying folds that create an uneasy feeling.

EN 388:2016

• Anti cut level 5

Standard EN 388:2016

GLOVES PROTECTING FROM MECHANICAL RISKS

This standard applies to all kinds of protective gloves in terms of physical and mechanical hazards caused by abrasion, blade cuts, puncture and tearing. The level of protection against mechanical hazards is expressed by an icon followed by four numbers (performance levels), each representing the performance against a specific hazard.

The EN 388, similar to ANSI/ISEA 105, is the European standard used to evaluate mechanical risks for hand protection. Gloves with a EN 388 rating are third party tested, and rated for abrasion, cut, tear, and puncture resistance. Cut resistance is rated 1-5, while all other physical performance factors are rated 1-4. Up until now, the EN 388 standard used only the "Coup Test" to test for cut resistance. The new EN 388 2016 standard uses both the "Coup Test" and the "TDM-100 Test" to measure cut resistance for a more accurate score.

| Performance Level Rating | | | | | | |
|----------------------------------|-------|-----|-----|------|------|------|
| Test | 0 | 1 | 2 | 3 | 4 | 5 |
| a. Abrasion resistance (cycles) | < 100 | 100 | 500 | 2000 | 8000 | - |
| b. Blade cut resistance (factor) | < 1.2 | 1.2 | 2.5 | 5.0 | 10.0 | 20.0 |
| c. Tear resistance (newton) | < 10 | 10 | 25 | 50 | 75 | - |
| d. Puncture resistance (newton) | < 20 | 20 | 60 | 100 | 150 | - |

| Gloves with Level Rating | |
|--------------------------|----------------|
| Article | Level |
| Procut | 4X42D |
| Proshield | 4X42F |
| Protector | 4X44C and 4544 |
| Shield | 4X43C and 4543 |
| Prodry | 2131 |
| Allflex | 4132 |
| Construhot | 2131 / X2X |
| Constructo | 3243 |
| Prosoft | 3121 |
| Superpro | 4121 |
| Multitask | 4131 |

- a. Resistance to abrasion: based on the number of cycles required to abrade through the sample glove.
- b. Blade cut resistance: based on the number of cycles required to cut through the sample at a constant speed.
- c. Tear resistance: based on the amount of force required to tear the sample.
- d. Puncture resistance: based on the amount of force required to pierce the sample with a standard sized point.

PROTECTOR 4544 4X44C

PRODRY 2131X

BLB

Cut resistant HPPE (high performance polyethylene) glove with double nitrile coating

The seamless PROTECTOR cut resistant gloves of Safety Jogger guarantee dexterity, safety, grip and reliability. They were designed to provide maximum mechanical strength for light to heavy working conditions. Next to a maximum cut resistance these gloves offer huge comfort and dexterity. The ideal solution for activities in less favorable conditions. Seamless HPPE liner with double nitrile coating. First coating (blue) on the palm of the hand and on 3/4 of the back of the hand. Second coating (black) in foamed nitrile (for better grip in humid condition) on palm of the hand and fingertips.

| | |

SAFETY JOGGER

PROFESSIONAL

Antistatic ESD

By friction of clothes a person becomes charged with **static electricity**. Without a constant discharge, you can easily load up to 3,000 volts without even noticing!

This charge can be unintentionally passed through by touching electronic equipment. 100 volts can already suffice to damage a sensitive (but maybe vital) equipment.

Always wear **ESD (Electro Static Discharge)** shoes to prevent static electricity from building up.

Shock absorbing & ultra-light

All day long, you are on your feet. The materials Oxy pas uses for the soles and insoles **absorb shocks** and therefor offer **more comfort**.

Moreover, we strive to make our shoes **as light as possible** to make your daily kilometers as enjoyable as possible.

Slip resistant outsoles

The level of grip of an slip resistant sole is determined by a test measuring the friction coefficient between the sole and the surface. This is tested on the flat outsole and heel.

If the sole has a good grip on a wet, stone floor (Ceramic surface with a mix of soap and water), it obtains the **SRA standard**.

If the sole has good grip on a dirty, metal floor (Steel surface with glycerol), it gets the **SRB standard**.

If the sole passes the SRA and SRB tests, it gets the **SRC standard**.

Discover our latest outsole with Oxygrip®-technology on page 6. The test results show that Oxygrip® scores far above the required values at both of the tests. Safety guaranteed.

Removable insole

Most Oxy pas models feature a **removable insole**. Renew your insole at a regular base or use your own orthopedic insoles.

Maintenance

Do your shoes often get dirty? Choose a model in leather or synthetic leather as they can **easily and quickly** be cleaned with a damp cloth and soap.

Coolmax®-lining

Coolmax® is a technical material which effectively drains perspiration. In contrast to a normal cotton or synthetic fiber, the Coolmax®- fiber consists out of 4 very thin round tubes. Small canals between the tubes transport the perspiration to the outside. As a result, the transpiration spreads quicker and evaporates 4 times faster than using cotton.

Why choose Safety Jogger Professional?

Our shoes are equipped with all technical features which are important for nursing staff. Below, you will find more information on the main specifications. Further on in the catalog, you will find the valid specifications per model.

CE Standard

The **CE certification** guarantees that the shoes are in accordance with the valid European standards for work or safety shoes:

- **EN 20347**: work shoes without reinforced toe.
- **EN 20346**: safety shoes with reinforced toe, resistant to an impact of up to 100 joules.
- **EN 20345**: safety shoes with reinforced toe, resistant to an impact of up to 200 joules.

Not all features apply to all models. Please check the product information per model.

The Move collection consists of leather shoes with an ultralight slip resistant outsole.

Leather upper: can easily be cleaned with a damp cloth and some soap.

Coolmax®-lining: keeps your feet cool and draws perspiration away from the skin.

Removable insole: regularly renew your insoles or use your own orthopedic insoles.

ULTRALIGHT & SHOCK ABSORBING

The EVA midsole is ultralight and flexible, providing excellent shock absorption. The shoe weighs about 250 grams.

SLIP RESISTANCE SRC

The rubber outsole ensures maximum grip on both wet and dry surfaces and is compliant with the SRC non-slip standard (SRA+SRB).

ANTI-STATIC ESD

The shoe features an anti-static insert that facilitates the dissipation of static electricity and complies with the anti-static standard ESD (Electrostatic Discharge).

Disposable sterile surgical mask

Pharmamask is a disposable sterile surgical mask, CE certified. This product is suitable for use in a general medical environment. It is composed out of three materials: a non-woven fabric, a nose strip and an elastic band. The face mask is divided into an inner-, middle- and outer polypropylene fiber meltblown fabric. The nose strip is made of a galvanized metal strip.

- Adjustable nose bridge
- Comfortable & breathable
- Special 3-ply non-woven design

CE EN14683-2019 TYPE IIR BFE ≥98%

Shock absorbing watch

This watch in a silicone brooch is **water resistant** and compliant with the **ROHS standard**. The clock in the brooch can be turned up or down in the direction you prefer.

TACTICAL

waterproof boots

Boots labeled 'waterproof' provide the highest quality level of protection from water and liquids. They keep your feet comfortably dry in numerous environments.

comfortable footbed

The comfortable footbed is developed with an exceptional perforated structure. This ensures lightness, air breathability and comfort all day long. The footbed takes full-surface foot support to the next level while maintaining all other features such as shock impact zone, arch support, shock absorption, electrostatic discharge. With this footbed, your feet will feel comfortable all day long.

certified slip resistance

SRA slip resistant soles are tested on a ceramic tile wetted with dilute soap solution.

+ **SRB** slip resistant soles are tested on smooth steel with glycerol.

= **SRC** slip resistant soles pass both SRA and SRB slip resistance tests.

Alcatraz Metal Festival

Alcatraz Metal & Hard Rock Festival in Kortrijk, Belgium is a total experience. The grounds at Sportcampus Lange Munte were arranged as a prison where the guard - Officer Nice, the mascot here - greets you at the entrance. The festival derives its name from the famous prison island off the coast of San Francisco. The festival visitors tell them that they went "to prison", where they were locked up with a series of excellent bands.

For half a decade, Safety Jogger supports the Alcatraz community by offering safety footwear & T-shirts for every volunteer or worker involved in putting together this unreal festival. We also provide big-top tents & other must-have items for music events. In return we're able to promote our rock-solid brand to a community in which we are very active.

| Stijn De Jaegere Aerobatics

With these words, Wilbur Wright confirmed his plans a few minutes before he made the first public flight with a motorized aeroplane. A hundred years later, Stijn De Jaeghere is equally determined to realize his flight plans and now goes to extremes to reach the top in aerobatics.

Since several years Safety Jogger is not only visible on the ground, but also in the air! We've known Stijn for years and his story behind aerobatics and the dedication that he has shown to achieve his goal is admirable, we're delighted that we can support him in his flight to the top!
