

PRODUCT LINE

JACKETS & VESTS

The Collection

**myrtle
beach**

**JAMES &
NICHOLSON**

BRAND STATEMENT

Both in textile promotion and in corporate fashion wear **JAMES & NICHOLSON** and **myrtle beach** are meanwhile among the best-known and most popular brands. The product diversity of the two product lines is unparalleled and is expanded every year by around **100 fashionable novelties**. In the fields of sports, leisure, business and work there is hardly any top or head-gear which is not included in the diverse product line.

The selection of the two brands comprises about 900 fashionable products, which are always available in a quantity of approximately 20 million pieces and a stock availability of around 98%. Extremely short delivery periods are a major plus **JAMES & NICHOLSON** and **myrtle beach** offer their customers. Service takes top priority – in day-to-day business the focus is always on the customer. That is why the quality of the product lines is the most important thing of the company philosophy – from inception to completion and beyond.

JAMES & NICHOLSON and **myrtle beach** are manufactured with social and ecological responsibility. All the textiles are **REACH compliant** and manufactured according to **Oeko-Tex® Standard 100**. Since 1999 social and environmental aspects have been integrated into the company code of conduct. They are submitted to strict controls.

All the caps and beanies shown in the catalogue are products of our myrtle beach collection.

MADE WITH RESPONSIBILITY

SOCIAL COMPLIANCE

As members of the ‚BSCI/Business Social Compliance Initiative‘ we commit ourselves to implementing the BSCI code of conduct as part of our business relations with our manufacturers and thus to improving the working conditions within our supply chain and to producing our textiles fairly. This includes our clear commitment to the employees’ right to freedom of assembly, protection against discrimination, and an adequate remuneration, that is, at least the statutory national minimum wage.

Another central component is the occupational safety regulations. That is how we guarantee that the occupational safety regulations of the ILO (International Labour Organisation) are met.

Child labour, forced labour or precarious jobs are not tolerated. Several social compliance departments in the countries of production test all the factories thoroughly and make sure that these conditions are met.

PROTECTION OF THE ENVIRONMENT

All the products of **myrtle beach** and **JAMES & NICHOLSON** are produced in an environmentally friendly way.

QUALITY STANDARD

The merchandise is regularly tested by certified testing institutes in the countries of production regarding the given parameters. Moreover, in cooperation with SGS, Testex, Hohenstein and other renowned institutes the quality is continually controlled.

OEKO-TEX® STANDARD 100

This standard guarantees that textile and non-textile product components pose no threat to health.

ADHERENCE TO THE REACH-REGULATIONS

We assure you that when manufacturing our **myrtle beach** products and **JAMES & NICHOLSON** textiles we meet the obligations of the REACH-regulations.

FUNCTIONS & FEATURES

BIONIC-FINISH®ECO

BIONIC-FINISH® was developed, following the example set by nature, 'learning from nature'. The textile is protected against water and dirt by a very thin crystalline structure. BIONIC-FINISH®ECO protects man and nature.

DUPONT™ SORONA®

Sorona® renewably sourced fibre delivers superior performance benefits to today's fashion. Fabrics that use Sorona® are very soft, very strong and dry very quickly. Sorona® helps fabrics stretch comfortably and retain their shape. Moreover, it contains plant-based ingredients. DuPont™ Sorona®. Designed for Performance. Derived from Nature.

PRIMALOFT® SPORT

PrimaLoft® SPORT is a highly functional padding with excellent insulation qualities, which is extremely soft, light-weight, waterproof and breathable. Specially developed fibres form small air chambers which store body warmth very well, thus keeping the cold out. Thanks to a very thin surface structure the textile is waterproof, however it evacuates moisture from the skin to the fabric surface where it evaporates. Due to this, the skin will remain pleasantly warm.

SOFTSHELL

Softshell with TPU membrane consists of three layers. Due to the microporous TPU membrane as middle layer the material is water-proof, wind-proof and breathable at the same time.

BREATHABILITY/ PERMEABILITY TO VAPOUR

Functional textiles must have the ability to transport moisture from the skin to the fabric surface as fast as possible. Permeability shows how much vapour in grams can evaporate on a surface of 1 m² within 24 hours. The higher this figure, the more breathable the textile is.

WATER COLUMN

The ability to withstand water pressure without moisture penetrating into the material is given by the water column (mm). The minimum standard is a water column of 1,500 mm.

TAPED SEAMS

To avoid moisture penetrating into the fabric, seams can get taped. Taped seams are 100% water-proof.
