# MONITOR

SAFE AND SMART

## STORY

Not since our hike in the Monitor Mountain Range in Nevada, the day when we got the idea for our footwear. Even back then we had a different mindset. We realized that it was possible to create a new generation of safety footwear based on technical hiking boots. It was the basis for our brand, which we named after the mountain range where we got our inspiration. Monitor Shoes had come into existence. The ability to change mindset. To see what others are not seeing, to break with convention and forge our own path – doing things our own way is the essence of our brand.

## DEVELOPMENT

When developing new products the focus is always on safety and the needs of the user. Considerable experience and an in-depth knowledge of the anatomy of the foot, combined with the latest footwear manufacturing technology, is what forms the basis for the safety footwear of the future.

Carefully selected materials, solid craftsmanship and an innovative mindset ensure technically advanced footwear with features such as low weight, good breathability and shock absorption. Maximum performance and comfort eight hours a day, and longer. Design is another area in which we differ from the rest. We never compromise on quality or functionality. But at the same time we put just as much emphasis into creating a unique visual identity, design and style, which ensures that our products stand out from the crowd. This is probably why Monitor has in a short time become one of Scandinavia's leading manufacturers of safety footwear and clothes. Created for everyone who, just like us, cares about what they have on their feet, and dares to forge their own path.

---

# THE ART OF BEING ONE STEP AHEAD

Innovation without a solid foundation of knowledge is not possible. At Monitor, we always strive to be at the forefront of development. Curiosity and being open to change are two of the tools that we employ. But we also need to be mindful of the needs of our customers, market changes and new trends. We never rest on our laurels and employ smart collaboration and knowledge sharing to retain our position at the forefront of safety footwear and clothes development. This is also the reason why we challenge the norms and forge our own path. If you're like us - then you'll understand exactly how we think.

---

# SAFE AND SMART DESIGN

Our motto Safe & Smart sums up exactly what our design work is all about. That safety always comes first. This is something we never compromise on. Each shoe must have the highest possible rating in its respective protection class. But we attach equal importance to the design and styling of our footwear and clothes. In this work we are inspired by our environment and trends, as well as by new technology and new materials. This provides us with plenty of new opportunities for both aesthetic and functional designs. Our own unique style that we are very proud of.

\*1 Min. 80 min no water penetration

\*2 No water penetration

\*3 Can be SRA, SRB or SRC

Minimum requirement for certification of occupational and safety footwear is the slip resistance provided according to SRA, SRB or SRC

SRA: Slip resistance on ceramic tiles and cleaning agents.

SRB: Slip resistance on steel floor and glycerin.

SRC: (SRA + SRB): Slip resistance on ceramic tiles, cleaning agents, steel floor and glycerin.

HRQ: Heat-resistant outsole that can withstand up to 300 °C for one minute, which can help prevent injury

Hard-wearing

### SS2

Monitor Safe & Smart SS2 insoles combine cushioning with comfort. The sole is made of dual-density polyurethane with extra shock absorption panels under the heel and forefoot. The middle portion of the sole is built up and provides extra arch support. The upper part is covered with airy fabric.

### OutDry®

OutDry® is a patented waterproofing technology that truly revolutionizes the current standard membrane construction. Only OutDry® uses a waterproof and breathable membrane applied directly to the shoe upper to keep water out and maintain constant breathability.

### Boa®

Boa® is a quick, simple and durable lace system for personalized comfort and uniform closure without pressure points.

### SS2.0

Monitor Safe & Smart SS2.0 Insole with dual shock absorption zones in PU and distinct arch support. ESD-approved.

### THINSULATE®

Heat-insulating Thinsulate™ fibers that are breathable and keep your feet warm.

### MONITEX®

Monitex is a high-tech material designed to be waterproof and windproof. Monitex ensures good breathability to keep your feet dry and comfortable.

### SAFE AND SMART CUSHION CONTROL

Insole with memory foam that absorbs shocks, is breathable and molds to the foot, while also absorbing moisture and odor.

### VIBRAM

The brand was founded by Whiteale Bramani in 1907 and specializes in developing technical soles that are adapted to the application.

### STEEL TOECAP

Protects toes from falling objects and compression.

### ALUMINUM TOECAP

Protects toes from falling objects and compression. Half the weight of steel.

### COMPOSITE TOECAP

Protects toes from falling objects and compression. Lightweight material and no metal to conduct heat or cold.

### WATERPROOF

The shoe has a waterproof membrane. Follow shoe care instructions.

### WATER-REPELLENT

Water-repellent leather/textile.

### WINTER LINING

These shoes have a winter lining to keep feet warm. The choice of sock is also important.

### PENETRATION PROTECTION (STEEL)

Protects against penetration by nails and other objects.

### SOFT PENETRATION PROTECTION

APT protection for a lighter, more flexible shoe.

### PANTZAR APT

Penetration protection is provided by Monitor's new Pantzar APT, which is extremely light, flexible and safe.

### MULTIPLE WIDTHS

Our safety footwear is available in different width fittings. Individual fit for increased comfort and safety.

Monitor's Q fitting is adapted for women and designed to provide optimum comfort for the female foot.

### HYPERTEX (PU Tek technology)

Hypertex employs new technology with threads that have ultra-high resistance to abrasion, woven directly into high-resistance fabric to produce textiles with the ultimate mechanical performance!

### X LIGHT

Extra lightweight safety footwear that provides a sporty and comfortable feeling when walking.

### ESD-GODKÄND

The sole dissipates static electricity in accordance with ESD requirements. 0-35 MΩ

### LADY

Specially selected safety and occupational footwear for women. These shoes have a more feminine fit – for the right size and width.

### WED ( WIRE ELECTRICITY DISCHARGE )

Strip with conductive carbon filament. Upon contact with the foot, this feature guarantees antistatic shoes over time, with all types of hygienic insole.

### MONITOR X4

The X-max material in the sole is antistatic, shock-absorbing and has superior breathability, while the FlyFit fabric next to the foot keeps the foot cool.

### NON-METAL

The shoe is 100% metal-free.

- Heel cup for better support
- Suitable for all Monitor safety shoes and occupational footwear

## MONIFRESH - SKUNK BUSTER

Art: 800333 Sizes: ONESIZE

Deodorizing pouches that absorb moisture, eliminate odor and leave a fresh scent. Place them overnight in shoes, drawers, bags or sports equipment. The pouches may sometimes need to be left in place for longer to achieve full effect.

Scent lasts approx. 2-4 months. The pouches are designed to remove moisture and eliminate odor for up to 1 year. Refresh pouches after prolonged use by hanging them up in a well-ventilated space. Then shake gently until the pouch and its contents return to their original state.

GERMANY

### IRONMAN GEL TRIPPLE DENSITY

<b>ART</b>	800205-03	» TPR = Thermoplastic rubber/gel
	36-48	» Triple-density gel
	7 double sizes	» Built-up heel

Ironman All Sport is the ideal insole for anyone who needs greater shock absorption as well as a stable, built-up sole. All Sport has gel pads in the heel and under the forefoot and has a stable TPU shank at the back of the sole. All Sport also has built-up arch support and meta-tarsal arch support for the medial arch.

### IRONMAN GEEL HEEL

<b>ART</b>	800204-03	» TPR = Thermoplastic rubber/gel
	ONE SIZE	» Dual-density gel
		» Non-slip function

Ironman's Gel Heel provides excellent cushioning as well as a comfortable feel. Gel Heel works best in shoes with narrower fronts, e.g. dress shoes. Gel Heel is designed to be non-slip and remains in place under the heel all day.

**IRONMAN**<sup>®</sup>

# ACCESSORIES

NEW

## MONIFRESH - SKUNK BUSTER
